Solicitation:  
[2015-NIST-SBIR-01](#)

Close Date:  
May 15, 2015  
Topic Number:  
9.04

Description:

New medical diagnostic tests, improving the quality and cost-effectiveness of health care electronic records, reference materials for laboratory test methods, faster screening of promising vaccines, these are a few of the many areas where National Institute of Standards and Technology (NIST) research serves the needs of the bioscience and health care community. NIST collaborates extensively with other federal and private organizations to provide the new measurements and standards methods, tools, and data needed to advance biosciences and health research. Bioscience and Health represent a large portion of that content.
